

Slett Round

Planlicht

Slett is a round LED surface profile that comes in tunable* LED, 3000k or 4000k, and it's also available in Low lumen output (more suitable for residential purposes), and high lumen output (more suited to commercial projects). Available in Dali dimmable. Fittings available in Direct, or Direct/Indirect.

This fitting is available in Surface mount, suspended and semi-recessed.

With the lamp housing in a flat, compact design made of seamlessly welded, powder-coated extruded aluminium. Available in silver RAL9006 or White RAL9016 fine matte finish (also Les Couleurs Le Corbusier colours range). The base plate is made from aluminium sheet for holding the lamp housing and LED boards. The die-cast aluminium housing attached to the back side for holding electronics. Light emission through a diffuser made of satined PMMA for an almost homogeneous emission of light; or a satined PMMA microprism for reduced brightness. Luminaire equipped with the latest generation of LED boards, colour rendering index CRI>80, small colour tolerance MacAdam 3.
