H Series H9, H10, H11

Lumen 8

H9, H10, H11 bring a new element to the H series family, playing off a structural hexagonal shape. Alternating the led lines of light create a different effect from all viewing angles. Multi laying this pendant would look fantastic in a high void or entry space. This simple, plain, yet versatile design still utilises a slim aluminium body and high efficiency LED tape to add the extra dimension to your space.

Whether your space is minimalistic or decorative, this geometric pendant is guaranteed to provide the sophisticated touch that your space deserves.

The H series H9, H10 and H11 are the standard sizes for this hexagonal design, however, custom sizes are available on request- Just ask our friendly designers!

For the exterior colour, go black, bronze, gold or clear anodised to complement other features within your space. For the interior colour, again go for a contrast to the exterior colour with black, bronze, gold or a clear anodised.

All pendants come with: LED driver (installed remotely in ceiling), ceiling canopy cup (80 x 80 x 25mm), 2m Stainless Steel Suspension, Cable Grip. The light source is 14w LED tape (1100 lumens p/metre), with a colour temperature of either 3000k or 4000k.

IP 20.
