H Series H12

Lumen 8

The elegant, simple, versatile vertical lineal pendant is unique and perfect for any long void space. This is not your typical, horizontal lineal pendant- it hangs vertically and has the potential to be used in a large custom void installation. The H12 could be combined with the H4 for a criss-cross effect.

The H series H12 is the standard size for this lineal design, however, custom sizes are available on request- Just ask our friendly designers!

For the exterior colour, go black, bronze, gold or clear anodised to complement other features within your space.

For the interior colour, again go for a contrast to the exterior colour with black, bronze, gold or a clear anodised.

All pendants come with: LED driver (installed remotely in ceiling), ceiling canopy cup (80 x 80 x 25mm), 2m Stainless Steel Suspension, Cable Grip. The light source is 14w LED tape (1100 lumens p/metre), with a colour temperature of either 3000k or 4000k.

IP 20.
