Puppet

Vistosi

This hand blown Murano glass chandelier consists of glass balls with an original, irregularly lined 'degradé' finish. It comes in a six light version and a 12 light version. There are two colour options for this pendant: Smoke glass with a Chrome/Grey cable, and white glass with Black/Black cable. Each glass ball can be hung individually to the user's preference- so one is able to make this light uniquely theirs. With a maximum diameter of 110cm, this large fitting would be perfect in a void, or in a general area given that the ceilings are high enough.

Product Name	Puppet
