Sant

Halla

An aluminium linear LED luminaire with an opal diffuser and a unique design. The SANT luminaire has an excellent performance, the embedded LED light sources achieve the operational efficiency of up to 150lm/W. Due to the angled diffuser, the light gets refracted down as well as back up onto the ceiling. The luminaire can be dimmable with direct-indirect lighting and the possibility of tunable white LED temperature as currently needed (2700K – 6500K). SANT is an ideal solution when low power consumption, high efficiency and attractive design are required. SANT may be used as a single standing or as a continuous lighting system.

Product Name	Sant
Manufacturer	Halla
Designer	Rob van Beek
Material	Aluminium/Polycarbonate
Colours	White, Black, Silver
Dimensions	Section: 66W x 92H (mm) Length varies from 562 - 2242mm
Lamp	LED
CRI	83+
Voltage	240v
