200 Mary Street

Lumen8

Check out Lumen8's latest installation on 200 Mary Street, Brisbane. This is the result of close collaboration with the client who wanted to create a unique commercial space. The design utilises the reflective surfaces through the space to illuminate the interior without littering the ceiling with downlights and keeping to clean, linear aesthetic. The product used to do so was Lumen8's own Logikline range. The 21w 4000k LED strip was coupled with the P5 surface extruded aluminium profile with opal diffuser, and was used to reflect the lineal architecture in the space.
