

Navicula by David Trubridge

Navicula is derived from nature, in this case from one of the many microscopic diatoms that float around in the oceans. The flowing, segmented form is shipped as flatpack and assembled on-site with push-in clips. However, our team can assemble them for you. Simply ask us!

Specifications

Light source	Dedicated LED	Finish	Natural Bamboo
Wattage	8W-18W		Caramel
Lumen (lm) Colour Temp (K)	850lm-1925lm at 2700K		White 1 Side
Light distribution	General		White 2 Sides
	Indirect		Black 1 Side
Colour rendering (CRI)	90-95		Black 2 Sides
