1x60W E26

Collezione realizzata con la tecnica bozzolo, in cui l'originale decoro diventa un vero e proprio materiale: la sovrapposizione di fili di vetro fuso a creare una texture in rilievo. Damasco è una delle creazioni di più lungo successo, che vede nel tempo versioni sempre nuove.

It is produced with the bozzolo technique, which consists in applying threads of molten glass that create an organic texture. Due to its versatility, it is one of our most successful series which has been developed and extended during the years with new versions.
